

What is GDPR?

General Data Protection Regulation (GDPR) is a set of guidelines and regulations aimed at protecting the user data of EU citizens.

The general guiding principle of GDPR is that users should have control over their personal data and that companies need to provide transparency about how personal information is stored and processed. For example, if a user signs up for a new service, the company would need to tell the user that their information is stored on their servers (and what protections are in place to safeguard this data), cookies may be used to track their activities, their data could be provided to third parties, etc. This regulation has binding legal force and will go into effect May 25, 2018.

Under the GDPR, the burden of proof that sufficient consent has been given lies with the company. This means that companies will need to prove and show reasonable evidence that they have complied with the GDPR if they are challenged.

Main Requirements of GDPR

- Add disclaimers to all forms, asking users to agree to the site's privacy policy before form submission.
- For email signups, per GDPR guidelines: an affirmative action signaling consent may include checking a box on a website, "choosing technical settings for information society services", or "another statement or conduct" that clearly indicates consent to the processing. Silence, pre-checked boxes, or inactivity are not adequate.
- Update privacy policy to indicate all the ways their personal data will be used and stored.
- Re-verify that users have opted to be a part of an email list. This can be accomplished by creating a re-permissioning campaign to bring an existing subscriber database up to GDPR standards.
- Provide users with a way to download their personal data and to request that their data be deleted from your system(s).
- Implement a plan for breach notifications, which are required to happen within 72 hours of the discovery of a breach.

Who is Affected by GDPR?

In general, GDPR applies to any organization operating within the EU, as well as any organization outside the EU which offers goods or services to customers or businesses in the EU. At a more granular level, the new regulation applies to companies in the EU processing any personal data and companies outside of the EU that are processing personal data of the individuals in the EU, including customers, prospects, employees or website visitors (if personal data is being tracked by cookies or other means). For example, if you are a U.S. company sending emails to subscribers in the EU, GDPR applies to you.

Penalties for Non-compliance

The maximum fine of **20 million euros or 4% of worldwide revenue** – whichever is greater – is for infringements of the rights of the data subjects, unauthorized international transfer of personal data, and failure to put procedures in place for or ignoring subject access requests for their data.

Trello Privacy Policy

The revised privacy policy will be effective starting on May 25, 2018

What this policy covers

Your privacy is important to us, and so is being transparent about how we collect, use, and share information about you. This policy is intended to help you understand:

- [What information we collect about you](#)
- [How we use information we collect](#)
- [How we share information we collect](#)
- [How we store and secure information we collect](#)
- [How to access and control your information](#)
- [How we transfer information we collect internationally](#)
- [Other important privacy information](#)

This Privacy Policy covers the information we collect about you when you use our products or services, or otherwise interact with Trello (for example, attending Trello events), unless a different privacy policy is displayed. This policy also explains your choices about how we use information about you. Your choices include how you can object to certain uses of information about you and how you can access and update certain information about you. **If you do not agree with this policy, do not access or use our Services or interact with any other aspect of our business.**

Example of a verification email requiring people to re-verify to remain on an email list. The original opt-in method may not have been in compliance with the GDPR.

OTHER GDPR NOTES

WordPress Admin Updates

For those sites that utilize WordPress, admin updates will be coming that provide GDPR-specific functionality (dedicated privacy policy page management and the ability to honor user data export requests).

These and other GDPR-related changes will be implemented into WordPress v4.9.6 which is due to be released in mid-May and WordPress v5.0 which is due out in later 2018.

OTHER GDPR NOTES

Google Analytics Data Retention

Beginning on May 25, 2018, Google Analytics is implementing a new data retention policy to better allow companies to be in compliance with the GDPR. The default setting for data retention that Google has implemented across all Google Analytics accounts is 26 months. This setting can be changed to never remove data. This only affects specific types of data, such as anonymous user data and custom segments.

Some companies may be implementing data retention policies and will be using the new data retention setting in Google Analytics to be in compliance.

The data retention settings are under Settings > Property > Tracking info > Data Retention.

The screenshot displays the Google Analytics Admin interface. At the top, there are two tabs: 'ADMIN' (selected) and 'USER'. Below the tabs, there are two main sections: 'Account' and 'Property'. The 'Account' section shows the account name 'radiology.ucsf.edu' and a '+ Create Account' button. Below this, there are four menu items: 'Account Settings', 'User Management', 'All Filters', and 'Trash Can'. The 'Property' section shows the property name 'http://radiology.ucsf.edu' and a '+ Create Property' button. Below this, there are four menu items: 'Property Settings', 'User Management', '.js Tracking Info', and a list of tracking-related settings: 'Tracking Code', 'Data Collection', 'Data Retention' (highlighted with a red box), 'User-ID', 'Session Settings', 'Organic Search Sources', 'Referral Exclusion List', and 'Search Term Exclusion List'.
